

# Moncton Energy Plan

Melissa Lee,  
Environmental Technologist

M O N C T O N

# Background

- Moncton joined the PCP Program in 2001
- Corporate baseline GHG inventory completed in 2002
- Community baseline GHG inventory completed in 2014
- ICSP was completed in 2011
  - Includes community energy targets
- Currently developing corporate LAP with a consultant

# Current Municipal Initiatives

- EV charging station at City Hall lot
  - Free to charge and park
- Traffic signal optimization program
- Free public transit during Environment Week
- Continually increase # of bike lanes & trails
- Assessing biomass heating potential in new capital project

# Challenges

- Staff time
- Availability of information to complete GHG inventories
  - Quality of data
  - Ease of access
- Finding champions within the community
- Financial incentives for community initiatives
- Keep momentum going

# Future Considerations

- Implement corporate action plan
  - Lead by example
- Assess community target
- Develop community action plan
- Work to create a culture of energy conservation and sustainability within the community

# Thank you!
