

STRATEGIC PLAN 2023-2025

Creating a Sustainable Net-Zero Future

VISION

A sustainable net-zero future where communities across Canada are prosperous.

MISSION

To help communities in Canada establish coordinated local action on energy and emissions.

VALUES

OBJECTIVE

Independent, non-partisan and committed to the public interest

INFORMATIVE

Trusted, credible and balanced information on energy and emissions

COLLABORATIVE

Considerate, inclusive with a problem-solving approach

INNOVATIVE

Curious, questioning and driving change

EQUITABLE

Equal opportunity with a commitment to diversity and inclusiveness

LONG-TERM OBJECTIVE

500 diverse communities in Canada are implementing durable and just net-zero strategies by 2030.

STRATEGIC PRIORITY

To dramatically increase the number of communities that are starting to thrive as a result of having built the capacity and ability to implement net-zero emissions strategies due to informed energy decision-making and supportive energy policy structures.

KEY ACTIVITIES

1 Accelerate the implementation of community energy and emissions plans (CEEPs).

2 Inform and influence the evolution of governance, policy and program development in the community energy sphere.
